JANUARY, 1909.

No. 1 OF EAGLE LIBRARY

THE BROOKLYN DAILY EAGLE.

and the inauguration of Elevated Trains on Williamsburg Bridge. Its Academy of Music Opera Ticket Contest attracted wide attention.

THE EAGLE'S LIGHT AND POWER SUPPLY.

ALL the artificial light used in the Eagle Building, and the power to run their entire equipment of machinery, including elevators, linotypes and printing presses, is electric, and is supplied by the Edison Electric Illuminating Company of Brooklyn. Prior to the opening of the enlarged Eagle Building in 1904, the machinery had been operated by steam. Then it was decided that for both the old and new plant electric power would be far more convenient and effective, and the change was determined upon. The original plans contemplated the generation of the necessary current by engines and dynamos on the premises, but a further and complete investigation prior to the purchase of dynamos convinced the Eagle that to secure driving energy from Edison mains would be a more advantageous and economical method of operation. Accordingly they entered into a five years' contract with the Edison Company for their exclusive lighting and power service, changed their elevators over from hydraulic to electric, and equipped all their typesetting, printing, stereotyping and book-binding machinery with direct connected electric motors, eliminating steam absolutely, except during the winter months, when it is used at low pressure for heating only.

The controlling reason that governed the Eagle in the making of this contract was economy, the management having become thoroughly convinced that they could buy their current supply from the Edison Company cheaper than it was possible to generate it in a plant of their own; but the absolute reliability of the Edison service was also a determining factor, for it can be readily appreciated that in the case of a daily newspaper, whose time of going to press is calculated to a nicety in order to make close connections with an extensive delivery system, any sudden failure or cessation of power, even for a few minutes, would be a very serious contingency, to be most carefully and zealously guarded against.

BOROUGH OF BRONX STREET AND AVENUE DIRECTORY.

COMPILED FOR EAGLE ALMANAC BY TROW DIRECTORY, PRINTING AND BOOKBINDING CO.

The following resolution, adopted by the Board of Aldermen March 21, 1882, and approved by the Mayor March 28, 1882, will explain the plan of numbering the streets north of Harlem River: That Willis Avenue be numbered, commencing at the Harlem River, and that said numbering run continuously through Willis, Melrose and Webster avenues. That all other avenues in the Twenty-third and Twenty-fourth Wards, having a generally northerly and southerly direction, be given the same number at the cross streets nearest their southern terminus as that on Willis, Melrose, and Webster avenues at the intersection of said cross street, and then numbered accordingly.

The prefix West is given to all cross streets in the Twenty-third and Twenty-fourth Wards lying west of Jerome av., which runs from Harlem River at Macomb's Dam Bridge to City line, and that the prefix East is given to all cross streets lying east of said avenue and the Harlem River.

The letters following names indicate position of the thoroughfare on the Almanac maps.

Changes in Street Directory.

The street directory of Greater New York is constantly changing. In Brooklyn many new streets have been laid out at Manhattan Beach, a great deal of swamp land having been filled in by an improvement company. In Bath Beach many streets have been extended to the water line.

In a short time the Eastern Parkway will be connected with Forest Park Boulevard, running through Cypress Hills Cemetery. In the Bronx, the streets are now divided into east and west from the Harlem River north, Jerome avenue being the dividing line. These streets have been renumbered. Manhattan has seen the least change of any of the boroughs in the matter of street changes.

In this year's street directory the parks, drives and markets have been eliminated, reference to which will be found in the index. The letters and numbers following each street in the directory serve as an index to the streets on the maps, which will be found in a pocket on the inside front cover. Corresponding letters and numbers will be found on the margin of these maps so that any street may easily be located.

COAL WEIGHING STATIONS.

The following scales have been designated by the Mayor as weighing stations for coal and coal vehicles under the provisions of Chap. 174 of the Laws of 1897: Under this law every purchaser of coal in New York City has the legal right to send any load of coal so purchased to any of the following scales to be weighed, provided that the scales shall be no more than one-half mile distant from the place of loading or the place of delivery.

The weighmaster is entitled to a fee of 15 cents a ton, which must be paid by the purchaser. After the loaded vehicle is weighed and the coal delivered to the purchaser, the driver must take the empty vehicle back to the scale to be weighed, and the weighmaster will then send a certificate.

Flushing—A. M. Ryon, coal dealer.

Coal Production.

The total production of coal in the United States for 1907 was 480,450,042 net tons, about 400,000,000 tons being bituminous, with a value, in round numbers, of \$800,000,000. About 10,000,000 tons of anthracite was used at the mines for colliery purposes, the remainder being prepared for domestic sizes, sold at an average of \$6 per ton. A fair estimate of value of coal product at point of consumption would be \$1,100,000,000.

ECLIPSES.

There will be four eclipses this year, two of the Sun and two of the Moon, as follows:

I. Total of the Moon June 3, the Moon rising more or less eclipsed, visible as follows:

Standard Time	P. M.	P. M.	P. M.	P. M.
75th Merid. (East)...	7.58	8.29	9.00	10.14
90th " (Cent.)...	6.58	7.29	8.00	9.14
105th " (Mt.)...				8.14
120th " (Pac.)...				

See Fig. I, upper portion, which shows the course of the Moon through the Earth's shadow, from west to east, the first contact being at *a*, the greatest eclipse at *c* and the end at *b*.

II. Central of the Sun June 17, visible as a partial eclipse on the Sun's northern limb as follows:

Visible throughout the entire United States, except in the extreme southwestern portion. The Sun will set more or less eclipsed east of a line from Brownsville, Texas, through Jefferson City, Mo., to Mackinaw City, Mich.

	Beginning Mean Time	Correction for Standard Time	Size at Sunset
Brooklyn-New York...	7.04 eve.	Sub. 4 min. E.	3 digits

Charleston.....	7.02 "	Add 20 " E.	1 "
St. Louis.....	6.14 "	" 1 " C.	2 "
New Orleans.....	6.37 "	" " C.	2 "

Fig. II shows the Sun with 1, 2, 3 and 4 digits cut from its northern part.

III. Total of the Moon Nov. 26-27, visible as follows:

Standard Time	Partial begins (a)	Total begins	Middle (c)	Total Ends	Partial (b) Ends
75th Meridian (East).....	2.11 A. M.	3.14 A. M.	3.55 A. M.	4.36 A. M.	5.38 A. M.

120th " (Pac.).....	11.11 P. M. (26th)	0.14 "	0 55 "	1.36 "	2.38 "

See Fig. I, lower portion, for the path of the Moon through the Earth's shadow, passing from *a* to *b* in 3 h. 28 min. The conical shadow, which the Earth projects into space, is about 1,000,000 miles long and its diameter, at the point where the Moon passes through it, is about 6,000 miles.

IV. Partial of the Sun Dec. 12, invisible.

GREAT COMET DUE IN 1909-10.

Halley's Comet, by some supposed to be the Star of Bethlehem, will again visit us this year. It will be visible to the naked eye in October, about midway between the Pleiades and Hyades on the west and Castor and Pollux in Gemini on the east, or about 7° to the right or west of the bright star Alhena in Gemini. Its period is about 75 years and it has been observed at these intervals since the 15th Century. Records show its probable return many centuries earlier. It last visited us in 1835 when its tail was about 20° long and its nucleus like the red star Antares.

PLANETS BRIGHTEST.

Mercury (♿): March. 3-8 and Oct. 23-31 as a Morning Star, rising shortly before the Sun; also April 27 to May 3, and Sept. 20-26, as an Evening Star, setting shortly after the Sun. Venus (♀): not this year, but she will be bright in December. Mars (♂): Sept. 25. (At this time Mars will be slightly nearer to us than in 1907, but will not again be favorably situated until 1924). Jupiter (♃): Feb. 28. Saturn (♄): Oct. 13. Uranus (♅): July 11.

CHART OF THE HEAVENS

Explanation—The Chart of the Heavens shows all the bright stars and groups visible in the U.S., Canada, Mexico, Cuba and Hawaii. Stars of the third magnitude are sometimes shown in order to complete a figure.

If a bright uncharted body be seen near the "Ecliptic Circle" it must be a planet. To locate the planets or Moon, refer to the tables, "Position of Planets" and "Moon's Place" in the Almanac pages, find the proper signs on the chart on the "Ecliptic Circle," and an inspection of that part of the Heavens, comparing with the chart, will serve to identify the planet and all the surrounding objects.

Because of the Earth's motion from W. to E. (opposite to the direction of the arrow in the chart), the stars rise 4 minutes earlier each day,

or 30 minutes per week, or 2 hours a month. The chart shows the position at 9 P.M. Then, if the position for any other hour be desired, as for 7 P.M., count back one month, or ahead one month for 11 P.M., and so on for any hour of the night.

A circle described from the zenith on the "Zenith Circle" for the desired latitude, with a radius of 90 degrees (see graduated meridian) will show what stars are above the horizon. Thus Capella is near the overhead (zenith) point on Lat. 40 degrees N. January 15, 9 P.M., as will be Algenib in the handle of the "Big Dipper" at 3 A.M. Then from Capella or Algenib all the surrounding visible groups can be identified. The "Pointers" being 5 degrees apart and always in sight may be used as a convenient unit of measure; also when visible, the "Belt of Orion" 3 degrees, or the sides of the "Square of Pegasus."

THE RITUALISTIC CALENDAR.

The Ritualistic calendar changes each year. In general the following is the order in which colors are used on the altar in Ritualistic churches in the U. S.:

White, from Christmas Day to the Octave of the Epiphany and from the first service on Easter Day to the Vigil of Pentecost, except red on the days commemorative of martyred saints. It is also used on Trinity Sunday, the conversion of St. Paul, the Purification, the Annunciation, the feast of St. John Baptist, St. Michael, St. Luke, All Saints, and on days commemorative of saints who are not martyrs.

Red, from the first Vespers of Pentecost to the first Vespers of Trinity Sunday; on the Day of Holy Innocents, if on a Sunday, and on feasts of all martyred saints.

Violet, from Septuagesima to Easter Eve (Maundy Thursday); from Advent Sunday, the beginning of the Church Year, until Christmas Eve; on Ember days, except in Whitsun week, on Rogation Days, and on Holy Innocents, if on a Sunday.

Black, on Good Friday and at funerals.

Green is prescribed for all other days.

HIGH WATER AT NEW YORK (GOVERNOR'S ISLAND).

The high water tables are from the book prepared and published by the United States Coast and Geodetic Survey at Washington. 0h. 00m. is midnight, and 12h. 00m. is noon. To change Eastern Standard Time to New York "Local Time," add 4 minutes. Eastern Standard Time is 5 hours slower than Greenwich Time. The height is reckoned at Governor's Island from level of average low water. All hours less than 12 are in the forenoon (a. m.), all greater are in the afternoon (p. m.), and when diminished by 12 give the time after noon; for instance, 15.47 is 3.47 p. m. ☉, new moon; ☾, 1st quar.; ☽, full moon; ♀, 3d quar.; E, moon on equator; N, S, moon farthest north or south of equator; A, P, moon in apogee or perigee.

WEATHER AND TEMPERATURE FLAGS.

NOTE.—The display of weather and temperature flags, with the exception of the cold-wave flag, is now confined to rural districts and towns of 5,000 or less inhabitants; the display has been discontinued in places of greater population. The cold-wave flag will be displayed as heretofore.

When No. 4 is placed above Nos. 1, 2, or 3, it indicates warmer; when below, colder; when not displayed, temperature is expected to remain about stationary. The cold-wave flag is displayed when an unusual fall in temperature and to near or below freezing, is anticipated. During the late spring and early fall the cold-wave flag is used to indicate anticipated frosts. When No. 5 is displayed, No. 4 is omitted. When displayed on poles, the signals should be arranged to read downward; when displayed from horizontal supports, a small streamer should be attached to indicate the point from which the signals are to be read.

Storm and Hurricane Warnings.

1st.—A storm warning; red flag with black center. 2d.—When red pennant is hoisted above storm warning, winds are expected from northeast quadrant; when below, from the southeast quadrant. 3d.—When white pennant is hoisted above storm warning, winds are expected from the northwest quadrant; when below, from the southwest quadrant. 4th.—Hurricane warning and dangerous storms, two red flags with black centers, displayed one above the other. 5th.—Night storm warnings; a red light for easterly winds and a white light above a red light for westerly winds.

GAZETTEER OF SUBURBAN NEW YORK.

A number attached to the initials N. Y. indicates the ward of that city. Air-line distances are reckoned from Brooklyn Borough Hall. Numbers at the left hand of names of places are for convenience of reference to them. A number following a place name, when preceded by the sign + indicates that the place is a part of or contiguous to the place indicated by the number; when the number is preceded by the sign = it indicates that the name belongs to the same place as that indicated by the number. The former town names are retained as aids in locating places occurring within the enlarged city limits of Greater New York. For Post Offices and Postmasters see page 72.

Brooklyn Tunnel Opening.

The Brooklyn tunnel was opened for traffic Jan. 9, 1908, the first public passenger train from Bowling Green, Manhattan, reaching Borough Hall, Brooklyn, at 12:48:30 A.M., starting in return from Borough Hall at 12:54 A.M. The eight car train carried 1,300 passengers, and was greeted by a crowd of upwards of 5,000 at Borough Hall, flashlights from the Brooklyn Eagle tower and flazes of light from surrounding buildings. The formal celebration by Brooklyn of the opening was postponed until 12 o'clock of the day, upon the arrival of the official train. The features of this celebration were the immense throng that had gathered about Borough Hall; the elaborate decorations throughout the downtown districts of public buildings, business houses, churches; the lining of the streets with gay colored bunting, flags and streamers; the ringing of

bells, shrieking of steam whistles and bombs—all of which led up to the reception of the official party of the train and the appropriate recognition of the event by the committee of arrangements, the executive committee being Bird S. Coler, Edward C. Blum, John B. Creighton and Charles F. Southard. This part of the programme was carried out from the front steps of Borough Hall. The borough president presided and those on the programme were: Pres. Patrick F. McGowan of the Board of Aldermen, Dr. St. Clair McKelway, Rev. Dr. Samuel Parkes Cadman, Stephen M. Griswold, Rev. Dr. Nehemiah Boynton, William Berri, Frank Hedley and Frank Bailey, all of whom made short addresses as representatives of various powerful divisions of Brooklyn's social, business and official life. After the speeches lunch was served at the Hamilton Club. An added feature was a parade of real estate business men 1,000 strong.

GAZETTEER OF LONG ISLAND.

Abbreviations: B'klyn; when this is followed by a number the ward is indicated; N. Hemp., North Hempstead; E. H., Easthampton; S. H., Southampton. Airline distances are reckoned from Brooklyn City Hall. Numbers at the left hand of the names of places are for convenience of reference to them. A number immediately following a name when preceded by the sign—indicates that the place named is a part of or adjoining to the place indicated by the number; when the number is preceded by the sign = it indicates simply another name for the same place. In connection with places occurring in the Borough of Queens the old town names are retained as an aid in locating such places more definitely. For Post Offices and Postmasters see page 72.

PARKS, DRIVES AND STATUES.

Brooklyn.

(Office, Litchfield Mansion, Prospect Park.)

The Park system of Brooklyn and Queens, under one park commissioner, consists of 59 parks, including 13 small gore parks. There are also 4 playgrounds and 20 parkways under the supervision of this Park Commissioner. The total acres of parks and parkways in these two boroughs is 2,238 acres. For officers and employees see index, "Municipal Government."

PARK STATUARY.

The statuary of Prospect Park includes the bronze figure of J. S. T. Stranahan, bronze busts of John Howard Payne, Thomas Moore, Washington Irving, Beethoven and Mozart. In Aug., 1895, a shaft was erected on the slope of Lookout Hill to the memory of the four hundred Maryland soldiers who defended the rear of the American Army upon its retreat after the Battle of Long Island. It was erected by the Baltimore Society of the Sons of the American Revolution, in conjunction with the Park Department.

The bronze statue of Major-Gen. Gouverneur Kemble Warren, near Memorial Arch, in the Park Plaza, was unveiled on July 4, 1896. The bronze statue of Abraham Lincoln, dedicated Oct. 21, 1899, is placed in the front part of the Flower Garden, overlooking the lake. It was paid for by popular subscription.

The bust of Mozart, in the Flower Garden, was unveiled Oct. 23, 1897. It is the gift of the "United Singers of Brooklyn" to the city, and was won by them as a prize in a saengerfest held in Philadelphia.

Immediately fronting the Park is the Plaza, and Soldiers and Sailors' Memorial Arch, erected to the memory of the soldiers and sailors who lost their lives in the war of the Union. The bas reliefs were prepared by Maurice J. Power, and show Lincoln and Grant on horseback, reviewing the army after the fall of Richmond. The arch in 1898 was further adorned by a bronze group on top, called the Quadriga, designed by Frederick MacMonnies; in 1900, two massive groups, one representing the Army and the other the Navy, for the sides.

At Gate 8, on the 9th av. side of Prospect Park, are two bronze panthers on pedestals. At Gate 4, at the Ocean Parkway entrance, are two specimens of bronze work in the shape of an athlete taming wild horses.

Other statues are scattered throughout the Borough. The Grant statue on Bedford av., near Dean, was unveiled April 25, 1896, the gift of the Union League Club to the city.

A statue of Henry Ward Beecher stands in the Park in front of the Borough Hall.

A statue of Alexander Hamilton graces the entrance to the Hamilton Club, Clinton and Remsen.

A statue of Gen. Fowler, a commander of the old 14th Regt., is in Fort Greene Park.

Skene monument, erected Jan., 1906, on a triangle north of Prospect Park Plaza, is a shaft of white marble, 13 ft. high, 8 ft. thick, surmounted by a bronze bust, three times life size, by J. Massey Rhind, Bklyn.; cost \$5,000.

The equestrian statue of Gen. Henry W. Slocum, designed by MacMonnies, heroic size, costing \$30,000, was unveiled May 30, 1905, at Bedford and Eastern pkwy, President Roosevelt making an address.

An equestrian statue of Gen. George Washington, in the Plaza of the Williamsburg Bridge. Donated to the city by ex-Register James R. Howe; cost \$50,000. Henry Merwin Shrady, sculptor. Unveiled Sept. 29, 1906.

Prison Ship Martyrs' Monument completed in Fort Greene Park, 1908. Height of shaft from lower plaza to top of bronze urn, 195.8 feet, from upper plaza 145.8 feet, the urn 20.8 feet. Diameter of shaft at the base is 17.6 feet, interior diameter, 9 feet. Electric elevator and two flights of stairs. Cost \$174,144. P. J. Carlin Co., contractors. Dedicated Nov. 14, 1908.

THE SHORE DRIVE.

Two arches connecting Shore Drive with 4th av. were completed in 1901, one under 2d av., the other under 3d av. The macadam road

under arches connects the Shore Road with 4th av. and will eventually be carried through to Fort Hamilton av.

Dyker Heights Park has a frontage on Gravesend Bay. The marsh in the center will be dredged and a lagoon created.

Sunset Park is on a high plateau with views of the harbor, Staten Island and a large part of Brooklyn.

Institute Park on Flatbush av., which divides it from Prospect Park and part of the original purchase of Prospect Park, has been developed into a picturesque space. An artificial lake has been made, trees and shrubs planted and hills constructed. Chap. 637, Laws of 1906, provides for an astronomical observatory, and Chap. 618, laws of 1906, provides for a botanical garden, both to be erected in Institute Park.

Seaside Park is the only property the city has on the ocean; developed in 1902.

A new park will also be constructed in the Eastern District, to be called Greenpoint Park, the Board of Estimate having authorized the condemnation of a plot of land in the 14th, 15th and 17th Wards, bounded by Berry, Nassau av., Lorimer, Driggs av., Manhattan av., Leonard, Bayard, Union av. and North 12th, comprising 45 acres. The value of the land is estimated at \$1,769,234.

The land used for playgrounds is within the territory to be acquired for the park, having been bought at private purchase.

Queens Parks.

The park equipment of Queens is not extensive. There are a few undeveloped triangles in Long Island City; College Point has two small parks; there are two in Flushing; Corona has a small, attractive park; Jamaica has one of seven acres, in which is located the historic King Manor and another small undeveloped park on a hill overlooking the town. Rainey Park, in Astoria, fronting East River, 7½ acres, is also undeveloped.

BROOKLYN FOREST.

Brooklyn Forest is a natural woodland park, extending from the boundary of Highland Park as far as Richmond Hill, in Queens. It cost about \$1,150,000. From its high points are obtained views of the Atlantic Ocean, Jamaica Bay and Long Island Sound. Roads have been made through and the main road is macadamized. The park drive leads into fine macadam roads connecting with Astoria, Flushing, the military reservation at Creedmoor, Whitestone, Queens and the north side of Long Island.

Highland Park, separated from Forest Park by cemetery property, adjoins the city reservoir. It contains many high eminences, and is a great pleasure ground for the East New York section.

City Hall Park constitutes a part of what was known in 17th century as "The Common Lands." At the close of the Revolutionary War improvements were begun. The city hall cornerstone was laid in 1803 and building used for the first time in 1811.

Madison Sq. Park was laid out as a Potters Field in 1794. The U. S. Govt. erected there an arsenal in 1806. Plans for improving the park were adopted in 1870.

Union Sq. Park was laid out in 1815 and enlarged in 1832, and plans for its improvement adopted in 1870.

Ground. Plans for its improvement were adopted in 1870; carried out in 1871.

Tompkins Sq. Park was a parade ground in 1866. It was paved with concrete, but has been remodeled and laid out as a park.

Central Park—(For a history of this park see Eagle Almanac of 1907). The drives aggregate 9,452 miles and the bridge roads 5,503 miles; the walks, 31 miles. Its area is 843.019 acres. The following are some of the principal features: At 59th st. and 5th av. the Scholars' Gate, adorned by a bust of Von Humboldt, unveiled 1874. In the southwest part is the playground and carousel for children, and beyond is the common lawn of 16 acres. The Menagerie is in the southeast part, clustered around the old Arsenal Building. The mall is a broad promenade, a quarter of a mile long and 208 feet wide, bordered by double rows of elm trees and famous for the collection of statues, prominent among which are: Shakespeare, by J. Q. A. Ward, erected on the 300th anniversary of the poet's birth; Burns and Scott; the "Indian Hunter," by Ward; Fitz Greene Halleck, and a colossal Beethoven bust. Near by is the Music Pavilion. The Terrace, a sumptuous pile of richly carved masonry, and the Lake come next in view, and the famous Bethesda fountain, designed by Emma Stebbins and made in Munich. Beyond the Lake is the Ramble, 36 acres, passing a bust of Schiller, rustic cabins, gorges and waterfalls. Farther on is the Belvedere, a tower of stone; next are the city reservoirs. On the left is the American Museum of Natural History. Admittance free, except on Mondays and Tuesdays (.25c.) Open (free) Tuesday and Saturday evenings. Opposite the Obelisk and near 5th av. and 83d is the Metropolitan Museum of Art. Admittance free except Mondays and Fridays (.25c.); Monday and Friday evenings, 8 to 10.

The greenhouses, opened 1899, cost \$55,000; located 300 feet south of E. 106th entrance.

Wm. H. Seward Park was opened to the public Oct. 17, 1903. This is the first park in Greater New York planned especially for playground and gymnasium features. It contains a splendid pavilion, shower baths, toilet facilities, etc.

Playgrounds during the summer are also maintained in Corlears Hook, Hamilton Fish, Tompkins Square, DeWitt Clinton, Hudson and Battery Parks.

DeWitt Clinton Park has maintained a children's farm garden since 1904.

The Bronx Parks.

Office, Zbrowski Mansion, Claremont Park.
 Van Cortlandt Park—Second in size in the borough, accessible by Putnam Div., N.Y.C. & H.R. R. R. and several trolley lines running through Jerome av. and Kingsbridge trolley. Van Cortlandt Lake comprises 25 acres. (For history of this park see Eagle Almanac for 1908.)
 Bronx—(For history of this park see Eagle Almanac for 1908.) The northerly section, about 250 acres, is set apart as a Botanical Garden, free to the public. The southeasterly section of the park, comprising 261 acres, is in charge of the Zoological Society. Admission free, except on Mons. and Thurs. (25c.). Bronx Park is reached by the 3d av. elevated to 161st, with transfer to West Farms; to 177th, with transfer to Tremont av. trolley as far as Southern Boulevard; to 177th, with transfer to 3d av. as far as Fordham. Also subway, West Farms branch, to 182d.
 Pelham Bay Park, with its coastal indentations, its picturesque bays and inlets and open water front, is one of the most beautiful in the world. It contains large tracts of woodland trees that are centuries old. This park is being developed by carriage roads and footpaths, has a fine new athletic and parade ground covering 120 acres, and an 18-hole golf course.
 Crotona Park is being improved and a fine athletic field has been laid out in it, containing ball diamonds, tennis courts, etc.
 Claremont Park lies on high ground, with an elevation of 100 ft. in places. It is fully developed, with many tennis courts and baseball diamonds. It contains the old Zbrowski mansion, now used for offices of the Park Dept.; acquired in 1888.
 St. Mary's Park was formerly a portion of the estate of Gouverneur Morris, a prominent delegate to the convention which framed the Constitution of the United States. A large portion of the park is very high, commanding fine views of the East River, L. I. Sound, Harlem and Hudson Rivers. Acquired in 1888.
 Franz Sigel Park (Cedar Park) lies on a high ridge overlooking the Harlem River. It was acquired June, 1885.
 Macomb's Dam Park was acquired in 1899 and is adjacent to several sections by the streets. It is adjacent to the Harlem River and is the headquarters for many rowing clubs. Contains baseball diamonds and tennis courts and a quarter mile running track.
 GRAND BOULEVARD AND CONCOURSE.
 The Concourse, under the jurisdiction of the Borough President of the Bronx, is designed to

PARKS, DRIVES AND STATUES—THE BRONX—Continued.

provide connection between Manhattan and the park systems in the northern and eastern portions of the Bronx. The estimated cost of the work of construction was \$1,052,153. The contract was let Aug. 20, 1902, the lowest bid being \$1,011,322.50. The ground was broken for the work by President Haffen on Oct. 2, 1902, at the junction of Morris av. and 175th. The time estimated for its construction was 1,000 working days.

The entrance to the concourse, including Cedar (Franz Sigel) Park, is a stretch of land 3,300 ft. long and from 400 to 500 ft. wide, and extends from N. Y. Central and Hudson River R. R. to E. 164th; the route of the concourse is along the ridge between Jerome and Webster avs. It is about 4 miles long and 182 ft. wide, crossing a deep valley at E. 175th with a beautiful masonry arch. It will have a central driveway for fast driving 56 ft. in width, a macadamized driveway on each side 24 ft. in width for general traffic, and access to abutting property. There will be 20 ft. sidewalks on each side, and between the central and side driveways bicycle paths will be constructed. The spaces between the driveways and the paths will be planted with trees and sodded. While the present contract does not provide for the nine transverse roads, and the tunnel at E. 147th, there are six of these roads under contract; the nine roads and the tunnel will be commenced before the completion of the concourse, and will probably be completed when the concourse is.

The concourse is connected with Manhattan by means of the Madison av. and 149th st. bridge at Lenox av., through Mott and Walton avs., and also by means of E. 161st st. and Central (Macomb's) bridge, with 7th av. boulevard and Washington Heights. On the southern end will be an elevated approach from 155th st. or Central Bridge. The land has been acquired for this structure and the cost of approach will be about \$500,000.

A further connection with 7th av. is proposed by the City Improvement Commission by means of a bridge over the Harlem River and a viaduct from the Harlem River to Mott av. across Cedar Park.

New Steamship Line, New York to Continent.

A new steamship line called the New York and Continental Line has lately commenced to carry passengers between Rotterdam and New York, with headquarters in London. Its vessels sail under the British flag. There are three steamships of 3,484, 5,026 and 5,026 registered tons, respectively, calculated to carry each about 80 cabin and 1,450 steerage passengers and will leave fortnightly from Hamburg, where they will take on cargo only. Thence proceeding to Rotterdam, where passengers will be embarked, then continue to New York, touching at Halifax, Nova Scotia, landing possible passengers for Canadian territory. The company has three new 14-knot steamers building in England, and when these are finished it hopes to take its share of the ocean carrying traffic.

Pawnbrokers in New York City.

Pawnbrokers pay yearly license of \$500 to city. Issued through the Bureau of Licenses, Room 1, City Hall, are under control of Mayor, must keep their books open to Mayor, Criminal Courts, Magistrates and Police. POPULATION—CITY, STATE AND NATION.

New York City Census, 1905.

New York City, as constituted prior to the act of consolidation, effective Jan. 1, 1898, had a population in 1890 of 1,515,301, compared with a population in 1900 of 3,437,202, showing an apparent increase of 1,921,901, or 126.8 per cent.

In 1890 the city comprised all of what is now Manhattan and greater part of what is now the Bronx, but under the act of consolidation Kings Co., Richmond Co., the larger part of Queens Co. and a small part of Westchester Co. became a part of the city.

Manhattan comprises that part of the old city south of the Harlem River, this area being known formerly as Manhattan Island.

Bronx was formed from that part of the old City of New York lying north of the Harlem River and the small part of Westchester Co. annexed under the act of consolidation. All of this area was at one time a part of Westchester Co., but in 1873 the towns of Morrisania, West Farms and King's Bridge were annexed to New York; under consolidation, Jan. 1, 1898, all of the town of Westchester and parts of the towns of Eastchester and Pelham became a part of the city.

The towns of Flatbush, Flatlands, Gravesend and New Utrecht were absorbed by the City of Brooklyn in 1894, Flatbush becoming the 29th Ward, New Utrecht the 30th Ward, Gravesend the 31st Ward, Flatlands the 32d Ward. The city thus became coextensive with Kings Co., and on Jan. 1, 1898, Brooklyn became one of the five boroughs of New York City.

Richmond County, or Staten Island, became the Borough of Richmond.

Queens Borough was organized at the same time from what was Long Island City, the towns of Flushing, Jamaica and Newtown, and a small portion of the town of Hempstead, all of which were civic divisions of Queens Co. The remaining towns of the county, Oyster Bay and North Hempstead, together with the greater part of the town of Hempstead, were taken to form the new county of Nassau.

It is impossible to state definitely the population in 1890 of that part of the town of Hempstead, Queens Co., which became a part of Queens Borough, and of the parts of the towns of Eastchester and Pelham, Westchester Co., which became a part of Bronx Borough, but in the following is shown the estimated population for the City of New York, as now constituted, and in detail for each borough of the city, from 1790 to 1900:

The preceding table shows that the area comprised within the present limits of the City of New York had an estimated population of 49,401 in 1790, which had grown to 696,115 in 1850, representing an increase of 646,714, or 1,309.1 per cent. The population of the present City of New York had grown to 2,507,414 in 1890, or an increase since 1850 of 1,811,299, or 260.2 per cent. Since 1890 there has been an increase of 929,788, or 37.1 per cent.

ESTIMATED POPULATION, 1910 TO 1950.

1950.....	2,000,000	7,000,000	4,000,000	6,000,000	250,000

The population of New York City on June 1, 1905, as actually enumerated, was 4,000,402, but from this total there was deducted 821 inmates of state and county institutions in the several boroughs of the city, which, under the plan of distributing the inmates of such institutions according to their actual residence at the time of admission to the institution, had been credited to other counties of the state, while there had been added 14,200 inmates of institutions who, at the time of their admission, were residents of New York City. These deductions and additions give a total population of 4,013,781, distributed by boroughs as shown in table No. 1.

These figures show an increase in population of N. Y. City from 1900 to 1905 of 576,579, or 16.8 per cent., as compared with an increase for the same area during the preceding 10 years of 929,788, or 37.1 per cent. The increases by boroughs are as follows:

The plan of distributing the population of public institutions is not observed in the U. S. Census and the gains or losses thus due should be borne in mind in making comparisons with the last two federal censuses. The net gain or loss in population in 1905, due to distribution of inmates of state and county institutions, according to city or town of residence at admission is summarized by boroughs as follows:

POSTAL REGULATIONS.

Domestic matter is divided into four classes, governed as follows:

1st—Embraces letters, postal cards, post cards, all matter wholly or partly in writing or sealed against inspection, postage 2 cents per ounce or fraction. Limit of weight, 4 pounds. Mail should be fully prepaid to insure rapid handling and quick delivery.

Postal cards issued by the Post Office Department may bear written, printed or other additions as follows: (a). The face of the card may be divided by a vertical line placed approximately one-third of the distance from the left end of the card; the space to the left of the line to be used for a message, etc., but the space to the right for the address only. (b). Addresses upon postal cards *** may be either written, printed or affixed thereto at the option of the sender. (Act of July 12, 1876, ch. 179, 1 Supp., 110). (c). Very thin sheets of paper may be attached to the card on condition that they completely adhere thereto. Such sheets may bear both writing and printing. (d). Advertisements, illustrations or writing may appear on the back of the card and on the left third of the face. The addition to a postal card of matter other than as above authorized will subject the card, when sent in the mails, to postage according to the character of the message—at the letter rate if wholly or partly in writing or the third-class rate if entirely in print. In either case the postage value of the stamp impressed upon the card will not be impaired. Postal cards must be treated in all respects as sealed letters, except that when undeliverable to the addressee they may not be returned to the sender. Postal cards bearing particles of glass, metal, mica, sand, tinsel, or other similar substances, are unmailable, except when enclosed in envelopes with proper postage attached, or when treated in such manner as will prevent the objectionable substances from being rubbed off or injuring persons handling the mails.

2d—Newspapers and periodicals in their entirety which have been entered as "Second Class Matter." Parts of publications are third class matter. Postage 1 cent for each 4 ounces or fraction thereof when mailed by other than publisher; postage to be fully prepaid or will be disposed of as waste. No limit of weight.

3d—Books, sections of periodicals, newspaper clippings, circulars and matter wholly in print, blue prints, proof sheets, corrected proof sheets and manuscript copy accompanying the same, engravings, lithographs, seeds, cuttings, bulbs, roots, scions and plants. Also facsimile copies made by a mechanical process such as the printing press, electric pen, mimeograph, hectograph, copygraph, etc., provided they are mailed at the post office window in the minimum number of twenty identical copies separately addressed. If mailed elsewhere or in less number, first class postage is required. A circular may have in writing therein the name of the addressee or sender or date; any other additions render it subject to first class postage. Postage 1 cent each 2 ounces or fraction thereof. Limit of weight, 4 pounds, except single books. Postage must be fully prepaid and great care exercised not to add any written words or figures except such as are permissible.

4th—Unsealed packages of merchandise and all matter not embraced in the first, second or third class, and which from its nature will not destroy or damage the mails or injure the persons handling it. Postage, 1 cent an ounce or fraction thereof. Must be fully prepaid. Limit of weight, 4 pounds. Permissible written additions: Name of sender and address and occupation, but only when preceded by the word "from" and any marks, names, numbers or letters for purpose of description. Sealed packages and other written additions render it liable to first class postage.

FORWARDING MAIL MATTER.

Matter of the first class can be forwarded until it reaches the addressee.

All other classes require prepayment of the original postage before forwarding.

WHAT CANNOT BE MAILED.

The following are unmailable: Liquids, ardent, vinous, spirituous or malt, or those liable to explosion or spontaneous ignition or combustion by shock or jar, inflammable oils, cocaine, poisons, explosives, animals, alive or dead (stuffed natural specimens excepted); explosive or poisonous powders, matches and other articles easily inflammable, fresh fruit and vegetables liable to decomposition, insects (except queen bees and their attendant bees and dried insects when safely secured), substances exhaling offensive odor, all other articles (not securely packed or cased, and then safely packed in hard wood or metal boxes with screw lids or secured by clasp or slide, strictly conforming to methods prescribed by the P. O. Dept.) which are liable to destroy, deface or damage other mail matter, or to harm the person of any one in the postal service; obscene or indecent books, prints, writings or papers; all letters upon the envelopes of which, or postal cards upon which, indecent, lewd, obscene or lascivious delineations, epithets, terms or language are written or printed; all matters concerning lotteries, so called gift concerns, or similar enterprises offering prizes, or concerning schemes devised or intended to defraud the public or for the purpose of obtaining money under false pretenses, and all mail matter not addressed to a post office or to no particular person, firm, company or publication.

PRIVATE MAILING CARDS.

An act of Congress, approved May 19, 1898, authorized the transmission in the mails of private cards bearing written messages. The law in brief states that it shall be lawful to transmit by mail, at the postage rate of one cent apiece, payable by stamps to be affixed by sender, and under such regulations as the Postmaster General may prescribe, written messages on private mailing cards, such cards to be sent openly in the mails to be approximately of same form, quality and weight as the stamped postal card now in use in U. S.

To be entitled to such privileges users of mailing cards must conform to these rules:

1. (a) A "post card" must be an unfolded piece of cardboard not exceeding 9 by 14 centimeters (approximately 3-9/16 by 5-9/16 inches), nor less than 7 by 10 centimeters (approximately 2-3/4 by 4 inches). (b) In form, quality and weight of paper must be substantially like the Government postal card. (c) Any color not interfering with a legible address and postmark. (d) It may or may not bear near the top of the face the words "Post Card." (e) Face of card may be divided by a vertical line; left half to be used for a message, etc.; that to the right for the address only. (f) Very thin sheets of paper may be attached to card, on condition that they completely adhere thereto; such sheets may bear both writing and printing. (g) Advertisements and illustrations may appear on back of card and left half of face.

2. Cards without cover, conforming to foregoing conditions, are transmissible in domestic mails (including the possessions of the United States) and to Cuba, Canada, Mexico, Republic of Panama, and the U. S. postal agency at Shanghai, China, at postage rate of 1 cent each.

3. When post cards are prepared by printers and stationers for sale, they should bear in upper right hand corner of face an oblong diagram containing the words "Place postage stamp here," and at bottom of space to the right of the vertical dividing line, the words "This space for the address."

4. Cards which do not conform to the conditions prescribed by these regulations are, when sent in the mails, chargeable with postage according to character of message—at letter rate, if wholly or partly in writing, or at third class rate, if entirely in print.

5. Cards bearing particles of glass, metal, mica, sand, tinsel or other similar substances, are unavailable, except when inclosed in envelopes, with proper postage attached, or when treated in such manner as will prevent the objectionable substance from being rubbed off or injuring persons handling the mails.

FISH, GAME AND FOREST LAWS OF NEW YORK.

The laws for the protection, preservation and propagation of birds, fish and wild animals in the State were codified and re-enacted by the Legislature in 1892, revised and re-enacted and consolidated with the forest laws in 1895, and were again revised and re-enacted in 1908, and are known as Chap. 130, Laws of 1908. They constitute Chap. 31 of general laws.

The law was materially strengthened in 1908. An important amendment was the Bureau of Marine Fisheries, which includes all salt water fisheries, shell fisheries and fisheries within the tidal waters of the State, except in the Hudson River above Newburgh. One of the duties of the bureau is to inspect or cause to be inspected the various oyster beds and other places within the State from which oysters and other shellfish are taken to be marked and sold for consumption, with a view of ascertaining the sanitary condition of such oyster beds and other places, and fitness of oysters and other shellfish in such places, or which are taken therefrom, for use as articles of food. After examination as to sanitary condition and report thereon any person who sells, causes to be sold or exposes for sale for consumption within this State any oysters or other shellfish taken from oyster beds or other places in New York which have not been certified to be in good sanitary condition, and product of which has not been certified to be fit for use as food, is deemed guilty of a misdemeanor.

Another important amendment is the hunting license law. Hunting licenses are now required for hunting all animals or birds. Licenses may be procured from any county, city or town clerk, and are good in any part of the State from the date of issue to December 31 of each year. License must be carried on the person and presented for inspection when required. Fee for residents of New York is \$1.10; for non-residents and aliens the fee is \$20.50, provided that the owner or owners of farm land, and their immediate family or families occupying and cultivating the same, or the lessee or lessees thereof and their immediate family or families who are actually occupying and cultivating the same, shall have the right to hunt and kill game on the farm land of which he or they are the bona fide owners or lessees during the season when it is lawful to kill game without procuring such resident license.

A law makes catching and killing beaver a misdemeanor punishable by a fine of \$100; the taking, killing or exposing for sale of all land turtles, or tortoises, including the box turtle and the wood turtle, a misdemeanor punishable by a fine of \$10.

An important law says that any person owning land which he reserves as private fishing premises, if stocked by the State at any time since April 17, 1896, from any of the hatcheries, hatching stations, or by fish furnished at expense of the State, shall remain open to the public to fish therein.

Another law states that: No trout of any kind, salmon trout or land locked salmon shall be taken away from waters of this State to stock a private pond or stream.

The law in its application to fresh water also provides for the licensing of nets. If nets are licensed and have a tag on, the protectors and foresters can identify owner of net illegally used, and if the tag is missing the net can be destroyed.

The law prohibits the polluting of streams or taking fish by drawing off water or by dynamite. No fishing through the ice in waters inhabited by trout or lake trout, except Lakes Ontario and Erie, Hudson River, St. Lawrence and Niagara rivers, during the close season for trout.

Game.

Game must not be transported out of State, except that one carcass of deer may be shipped with tag furnished with each non-resident hunting license.

Deer—Open season Sept. 16 to Oct. 31, both inclusive, in the counties of Clinton, Dutchess, Essex, Franklin, Fulton, Hamilton, Herkimer, Jefferson, Lewis, Oneida, Saratoga, St. Lawrence, Warren and Washington, except in all

Not more than two deer may be taken. Deer or venison may be possessed or sold from Sept. 16 to Nov. 5, both inclusive. Can be accepted for transportation up to midnight of Oct. 31. Only one carcass can be transported, and must be accompanied by owner, and not more than two carcasses can be thus transported in one year; but this does not apply to the head, feet or skin of deer carried separately. Traps, salt-licks and other devices, also crusting and yarding, are illegal. Jacking is prohibited. Deer must not be taken while in water and must not be taken between sunset and sunrise. On Long Island deer may be taken on the first two Wednesdays and first two Fridays after the first Tuesday of November. Dogs may be used there on those days only. Grouse, woodcock and quail shall not be possessed in close season, except in the month of December and first two days of January, and possession or sale thereof during December and first two days in January is presumptive evidence that they were unlawfully taken by the possessor.

Grouse, woodcock and quail shall not be transported within this State or into the State from a point without the State less than twenty-five miles from the State line unless accompanied by the actual owner thereof, and no person shall transport or accompany more than twenty grouse, thirty-six woodcock or thirty-six quail in any calendar year, or more than four grouse, six woodcock or six quail at one time.

PUBLIC SCHOOLS OF THE CITY OF NEW YORK.

Headquarters, Park av. and 59th, Mhnt.

The Board of Education consists of forty-six members appointed by the Mayor Jan. 1, for a term of 5 years. It consists of 22 members from Manhattan, 14 from Brooklyn, 4 from The Bronx, 4 from Queens and 2 from Richmond, who serve without pay and can hold no office of emolument under county, State or municipal government, except notary public, commissioner of deeds, or offices in the National Guard. Its members may be removed by the Mayor after a hearing for neglect or misconduct, and the Mayor has power to fill all vacancies. It has management and control of the public schools and public school system of the city, and is a corporation. On the first Monday of Feb. in each year the board organizes by the election of one of its members as Pres. It has power to appoint a Sec. of the Board, a Supt. of School Bldgs., term six years; Supt. of School Supplies, term six years; City Supt. of Schools, term six years; Supervisor of Lectures, term six years; one or more Auditors, a Chief Clerk and other officers, clerks or subordinates as necessary; to appoint 3 Associate City Supts. for a term of six years each, who with the City Supts. constitute the Board of Supts., and to appoint upon the nomination of the Board of Supts., 25 District Supts. to visit and inspect schools; to establish and conduct elementary schools, kindergartens, manual training schools, trade schools, truant schools, ev'g schools, vacation schools, free lectures and course of instruction, special classes, high schools, training schools for teachers, playgrounds, etc. All applicants for licenses to teach are examined by the Board of Examiners consisting of the City Supt. and four examiners appointed by Board of Education upon the nomination of City Supt. Principals, branch principals, heads of depts., teachers, assistants and all other members of the teaching staff are appointed by the Board of Education on nomination of Board of Supts. Nominations and appointments are made, except in cases of high schools or training schools for teachers, by the several Local School Board Districts, respectively, and of principals, teachers and others from eligible lists prepared by the Board of Examiners in order of the standing of candidates, provided that the Board of Supts. may consider for each appointment the three highest names on the appropriate list. It fixes salaries of members of supervising and teaching staff, salaries to be uniform in all boroughs. Salaries are fixed by the Board of Education in compliance with the Davis law. The Board of Estimate and Apportionment is required to appropriate for the General School Fund for payment of salaries an amount equivalent to 3 mills on every dollar of assessed valuation of real and personal estate in the city liable to taxation. The title to all property owned or acquired for educational purposes is vested in The City of New York, but is under the control of the Board of Education. The schools are free to all persons between 4 and 21 years of age, except that no child under 6 years shall be received except in kindergarten classes. The Board purchases all books, apparatus, stationery, etc., and upon recommendation of Board of Supts. approves text books, apparatus, etc. Money for the schools is raised by taxation in two funds—special school fund and general school fund. The general fund is for payment of salaries of teachers and the supervising force and the special fund all moneys not comprised in the general fund. The Board has the management of the public school teachers' retirement fund. It makes an annual report to the Mayor between Aug. 1 and Nov. 30, on conditions for the preceding school year, and also reports on the amount of money expended during preceding year. Members of the Board of Education, together with the Pres. of the Normal College, constitute the Board of Trustees of the Normal College, a separate and distinct organization furnishing education gratuitously to girls, pupils in the common schools of the city, or residents of the city. The Board of Trustees has the powers and duties required of trustees of colleges by the Revised Statutes.

The City Supt. of Schools has the right of visitation and inquiry in all of the schools of the city, and reports to the Board on the educational system of the city and the condition of the schools. He has a seat in the Board of Education and the right to speak on all matters before the Board, but not to vote. He must make an annual report to the Board. The Supt. of School Buildings is the executive officer of the Board in all matters relating to school buildings. The Supt. of School Supplies is executive officer of the Board respecting the purchase, storing and distribution of supplies, printing for the Board, transportation of school children, etc.

There are 46 local School Board Districts. In each district there is a Local School Board of 7 members (term five years)—5 appointed by the Pres. of the Borough, a member of the Board of Education designated by the Pres. and the District Supt. The duties of a Local Board are: To visit and inspect schools in the district; report thereon to the Board of Education; to recommend sites and erection of buildings; report to the Board dereliction of duty on the part of the Supt. of School Supplies, Supt. of School Buildings, City Supt. or any of their deputies, assistants or employees; to excuse absences of teachers, subject to the approval of the Board of Supts., where teachers are excused with pay; to try and determine all matters relating to discipline, corporal punishment and other matters of administration arising on complaint of pupils, parents or guardians against teachers or principals; to try charges made by principal, Dist. Matilda Ziegler Magazine for the Blind.

The Matilda Ziegler Magazine for the Blind, a monthly, was first issued in February, 1907. The New York point alphabet, which consists of a series of raised points embossed upon the paper, is the medium employed. The alphabet is made by the use of one or more of six points, placed in two parallel lines of three points each and is read by drawing the forefinger across the page determining the location of the points. Its circulation is 2,500. The blind in the United States number 70,000 in round numbers, of which but 15,000 can read. The magazine cost to the blind is a nominal price of 10 cents per year to pay postage. If the next Congress passes an enabling bill to send the magazine free of postage, it will then be absolutely free to the blind. The cost of the magazine, \$3.00 per year, for each copy, is financed by Mrs. Ziegler. The editor is Walter G. Holmes, and the printing office is at 306 W. 53d. Mhnt. The magazine has its own printing plant, in which are many blind people employed as proofreaders and sheet collectors and in other capacities. In bulk the magazine is, letter for letter, eight times the size of ordinary magazine printing and can be printed upon but one side of a page.

Hall of Fame.

In March, 1909, Chancellor MacCracken, of New York University, announced that \$200,000 had been given that institution for a Hall of Fame of great Americans. The conditions were that 50 names might be chosen in 1900 and 5 more each succeeding 5 years through the twentieth century. 100 electors from all of the 45 States were asked to make nominations and to indicate each one his choice of 50 names. Upon Oct. 1, 1900, it appeared that 29 names had received a majority of 51 votes. These were approved by the Senate (which has the power of veto), the number of votes for each being as follows: George Washington, 97; Abraham Lincoln, 96; Daniel Webster, 96; Benjamin Franklin, 94; Ulysses S. Grant, 93; John Marshall, 91; Thomas Jefferson, 91; Ralph Waldo Emerson, 87; Robert Fulton, 86; Henry W. Longfellow, 85; Washington Irving, 83; Jonathan Edwards, 82; Samuel F. B. Morse, 82; David G. Farragut, 79; Henry Clay, 74; Nathaniel Hawthorne, 73; George Peabody, 74; Peter Cooper, 69; Robert E. Lee, 68; Eli Whitney, 69; John J. Audubon, 67; Horace Mann, 67; Henry Ward Beecher, 64; James Kent, 65; Joseph Story, 64; John Adams, 62; Wm. E. Channing, 58; Gilbert Stuart, 52; Asa Gray, 51.

In Oct., 1905, the Senate received the ballots of 95 electors, of whom only 85 undertook to consider the names of women. A majority of 51 was demanded, but in the case of the names of women a majority of only 47. The following persons were found to be duly chosen: John Q. Adams, 60; James R. Lowell, 69; Wm. T. Sherman, 58; James Madison, 56; John G. Whittier, 53; Alex. Hamilton, 38; Louis Agassiz, 33; John P. Jones, 55; Mary Lyon, 59; Emma Willard, 50; Maria Mitchell, 48.

A bronze tablet for each of these 11 names was unveiled on Decoration Day, 1907, and a bronze bust of Horace Mann placed upon the parapet over his tablet. Foreign born Americans as well as natives are now eligible.
